

Cocoon FOP caching test

What's this?

This sample reuses the XSP cacheable sample page and allows you to test caching all the way up to PDF generation.

Note that I was unable to get caching to work when using the cocoon:/ protocol and the FileGenerator to access the output of the XSP sample. Using the XSP page directly with the serverpages generator works.

How to test the cache

Call this page as described below and use the information shown in **red** under *original output* below to check that the cache is working.

The sitemap log (or whatever log the FOPSerializer is configured to write to) can also be used to tell if FOP is converting the data or if its being served from the Cocoon cache.

Different values of *pageKey* should cause different versions of the document to be cached.

The number at the end of the page name is the number of pages to generate in the output PDF.

Original output from the XSP page

The test links below are not processed in the PDF version of this sample.

A Cacheable XSP Page Hi there! I'm a simple dynamic page generated by XSP (eXtensible Server Pages). I need 2 seconds to be generated, so you can tell if I'm being served from the cache or not.

What you see here has been generated on **Thu Nov 26 02:15:20 EST 2009**. I'm cached for every different value of request parameter 'pageKey'.

Here the value is: **ONE**.

If this is not the same as the 'pageKey' parameter in the page URL, we have a problem. All other request parameters do not influence cache status, but my validity will expire after 60 seconds (set by 'validity' URL parameter when page is generated). Value of parameter 'other' is: **xyz**.

This might be different than the URL parameter 'other', in case the version of the page you're seeing was cached from a request having the same 'pageKey' but a different value of 'other'. Test links: pageKey=one pageKey=two pageKey=three, other=abc pageKey=three, other=xyz pageKey=three, other=wow and 5 seconds of cache validity

Dummy pages

Several dummy pages follow, as set by the *pages* URL parameter.

Dummy page, used to slow down FOP generation to test caching... 250 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 249 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 248 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 247 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 246 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 245 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 244 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 243 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 242 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 241 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 240 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 239 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 238 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 237 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 236 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 235 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 234 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 233 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 232 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 231 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 230 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 229 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 228 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 227 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 226 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 225 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 224 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 223 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 222 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 221 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 220 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 219 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 218 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 217 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 216 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 215 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 214 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 213 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 212 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 211 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 210 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 209 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 208 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 207 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 206 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 205 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 204 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 37 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 36 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 35 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 34 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 33 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 32 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 31 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 30 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 29 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 28 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 27 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 26 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 25 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 24 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 23 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 22 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 21 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 20 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 19 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 18 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 17 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 16 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 15 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 14 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 13 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 12 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 11 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 10 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 9 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 8 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 7 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 6 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 5 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 4 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 3 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 2 pages to go.
The last page is number 251.

Dummy page, used to slow down FOP generation to test caching... 1 pages to go.
The last page is number 251.
